"Every Bulb a Gem"
1929 PRICE LIST
of
OREGON GROWN GLADIOLUS

GRANT E. MITSCH
"GLADLAND"
BROWNSVILLE, OREGON

Again I present my list of the "King of Summer Flowers" with many additions to my previous offerings. I hope my customers were pleased with the bulbs they bought of me last year. You may notice that I list many more varieties this year including a few of the newer ones.

The marvelous improvements made in Glads in the last few years have more than justified the popularity of this easily grown flower. It is, indeed a far call from the masterpieces of a few decades ago to the best of today. One needs but to attend the flower shows or read the accounts of them to find that the modern Glads are displacing the older varieties and are giving other flowers competition in the matter of popularity.

The exhibition flower, those with large florets and many open at once are usually picked out as the favorites, but the dainty primulinus varieties the delicate colored cut flower kinds, and the brilliant sturdy landscape sorts all claim the attention of the real Glad fan.

One may have Glads in bloom from June until frost and they are unsurpassable as cut flowers. They last a week or longer after being cut, the buds gradually opening out most or all of the spike has bloomed.

CULTURAL DIRECTIONS

Plant early in the spring as soon as danger of severe frosts is past. For a succession of bloom, plant every two or three weeks until the first of July. By planting both early and late varieties one may have a long blooming season from one planting. Bulbs should be placed in a trench from three to six inches deep. Plant large bulbs deeper than small ones, and plant deeper in light soil than in heavy soil. Six inches apart gives sufficient room for large bulbs; small ones may be planted closer. Avoid planting near trees or shrubbery as Glads like plenty of sunshine and water. If a fertilizer is used, apply it in the form of well rotted cow manure the fall previous to planting or use sheep manure or commercial fertilizers at planting time or during the growing season; however, do not let it come in contact with the bulbs.

When watering Glads, give them a thorough soaking and cultivate before a hard crust is formed. When cutting blooms for indoors, leave at least four or five leaves on the plant. Dig bulbs in fall after the foliage begins to turn brown or before hard freezing. Store in a dry, frost proof place for the winter.

Large bulbs should produce one or more good spikes of bloom. Most of the small bulbs will not bloom but will give as good spikes as large spikes in general.

TERMS

Bulbs can be shipped along the coast any time. Orders from east of the Cascade Mountains will be held until about March 15. One dozen bulbs at ten times the price of one. Three and six at a dozen rate. Orders for \$1.50 or more prepaid. For less amounts add 20 cents for postage and packing. 10 per cent extra in bulbs for orders over \$5.00. 5 per cent dis

count to members of the A. G. S. Those not members of the American Gladiolus Society may have this discount if they send me \$2.00 for membership. I will also add extras to your order. The Gladiolus Review published by the A. G. S. is well worth the \$2.00 to those interested in Glads.

Variety	Per Bulb	Large	Small
A. B. Kundred (K) heavily ruffled, flesh color		\$.10	\$.05
A. E. Kundred (K) large, wide open, salmon, ruffled			.40
Albania (Kemp) large white		.10	.05
Alice Tiplady (K) orange-saffron prim		.05	.03
Alton (K) very heavily ruffled orange		.10	.05
American Beauty (D) American Beauty rose, nearly all the flowers open at once		.10	.05
Anna Eberius (D) Rhodomine purple		.08	.05
Baron Hulot (Lemoine) Deep purple		.10	.05
Bengal Tiger (Pratt) large orange red with stripes		.08	.05
Butter Boy (K) Tall light yellow prim			.05
Butterfly (K) salmon prim		.05	.03
Byron L. Smith (K) delicate lavender		.08	.05
Carmelita (D) fine ashy grey with steel blue markings			.15
Carmen Sylva (Decorah) tall white, fine placement		.08	.05
Caroline Esberg (D) red		.10	.05
Charm (K) good rose pink		.10	.05
Copper Bronze (K) bronze prim			.10
Cremo (Geil) Cream with pink markings		.10	.05
Crimson Glow (Betscher) one of the best reds		.05	.03
Dick, tall blue or purple			.05
Dr. F. E. Bennett (D) wonderful scarlet, great exhibition variety		.20	.10
Dr. W. van Fleet (K) delicate rose pink and cream			.05
